DESIGN INSPIRATION

The Charlottetown Civic Centre is located on a cherished historic site, and is part of a premier entertainment destination that has become integral to the fabric of the community.

The renovation project shares a symbolic and practical connection to quilts – both are woven by themes of preservation, creativity, and connection. Both the renovation and the art of quilting represents the transformation of existing materials into something meaningful and renewed.

The design feature on the exterior façade is a nod to quilting and showcases a striking tapestry of blue and green geometric shapes, arranged in a quilt-inspired pattern that blends tradition with modern design. Angular forms interlock seamlessly across the surface. Shades of blue and green shift subtly in tone, creating depth and movement as the light changes throughout the day.

“..quilts commemorate historical events, travel adventures, friendships and special occasions. Island and family histories alike are bound up in them.”

– Sherri Davidson, Quilts of PEI
